GOVERNMENT-WIDE ACQUISITION CONTRACTS

ECS III is a \$6 billion, 10-year, Government-Wide Acquisition Contract (GWAC) for IT products/services at fixed prices that can be used by any federal civilian or DoD agency to fulfill IT requirements

everything ITSM

The scope of ECS III covers *everything ITSM* including all products and related services from simple hardware and software to integrated applications and enterprise services including cloud computing, health and biomedical IT, enterprise licenses, extended warranties, installation, training, maintenance, technical support, mobility, networking, security-related IT, virtualization, and more. Set-asides are also available.

- **Faster:** Streamlined ordering and procedures under FAR Subpart 16.505 save time, money and resources. Synopsizing or posting on FedBizOpps is *not* required.
- **Easier:** Secure, web-based Request for Quote (RFQ) system automates delivery order competition, management, awardee selection and notification.
- **Cost Competitive:** Best available ceiling prices negotiated at master contract level; delivery order competition drives prices even lower.
- **Control:** Delivery orders placed directly by agency with end-to-end management by procuring CO. Customized terms, conditions and additional products and services are easily added.
- **Contracts:** Agile and flexible in support of modular contracting and CONUS/OCONUS procurements. Contract access fee not to exceed .5% with a \$10,000 cap per delivery order, modification or exercise of option.
- **Customer Service:** 1-hour response to any contractual, technical or procedural question. Free on-site training available.

OMB Authorized GWACs for IT Acquisition
